Chapter 345: The Clash of Eternities

The cosmos trembled as Sung Jin-Woo and The Annihilator faced off in a battle that would shake the very foundation of existence. The multiverse's fate hung in the balance as two forces of unimaginable power collided. One sought to preserve and protect, while the other was born from the primordial chaos, bent on destroying all creation.

The Unleashing of Power

Sung Jin-Woo's eyes burned with divine fire, his four divine jewels glowing brightly. Each jewel represented a facet of his power—creation, life, destruction, and transcendence. Together, they formed an unbreakable bond that resonated with the very core of existence. His power surged, amplified by the Essence of Eternity, as the multiverse itself seemed to hold its breath in anticipation.

The Annihilator, an embodiment of pure destruction, stood like a towering abyss before him. It was a void so vast and incomprehensible that even the laws of reality bent and twisted around it. Its form was ever-changing, a swirling mass of shadows and chaos that threatened to swallow everything whole.

The First Strike

With a roar that echoed across realms, The Annihilator lunged forward, its monstrous appendage crashing toward Sung Jin-Woo. The air split as the void of its strike tore through space itself.

But Sung Jin-Woo was ready. In an instant, his body moved faster than the eye could follow. He summoned the power of the Essence of Eternity to teleport behind the approaching onslaught, his wings unfurling with a burst of divine light.

Sung Jin-Woo: "You seek to destroy... but creation is my domain!"

He unleashed a devastating Divine Wave, a concentrated burst of divine energy that tore through the fabric of reality. The blast struck The Annihilator head-on, causing it to stagger, its form flickering and distorting under the force. But the creature quickly reformed, its void-like essence regenerating with terrifying speed.

The Annihilator: "You cannot defeat what is eternal. I am beyond the laws of your creation."

The Power of the Divine Triad

Behind Sung Jin-Woo, the forces of the Divine Triad mobilized. The Twelve Divine Beings stood at the forefront of their respective realms, their powers extending across the cosmos as they joined the fray. Sung Su-Ho, the God of Dragons,

unleashed a storm of fiery energy, his dragons soaring through the air with unearthly speed and precision.

Meanwhile, Ashborn, the former Absolute Being, conjured immense cosmic forces, his celestial wings slicing through the void, bending time and space itself. The Heavenly Soldiers, Apostles of God, and all of the Divine Triad's followers worked in perfect harmony, creating barriers of light to protect the realms while launching coordinated strikes against the enemy.

But even with all their might, The Annihilator's forces were relentless. A horde of void creatures surged from the darkness, each one more powerful than the last, tearing through the defenses like paper.

Sung Jin-Woo's Resolve

Sung Jin-Woo's heart burned with an unyielding resolve. His powers surged, pushing the limits of the Essence of Eternity. His wings spread wide, casting shadows across the battleground. With a motion of his hand, he summoned forth a Divine Meteor Storm, a cascade of divine fire that blazed through the heavens, raining destruction upon The Annihilator's forces. The void creatures were obliterated in an instant, their essence disintegrating under the weight of his divine might.

But The Annihilator was not so easily defeated. It roared in defiance, the very space around it rippling with the energy of its destructive power. It opened its maw, unleashing a torrent of pure void energy that surged toward Sung Jin-Woo with the power to unravel everything in its path.

Sung Jin-Woo narrowed his eyes, and with a movement of his hand, he conjured a massive barrier of light—an impenetrable shield formed from the Essence of Eternity. The blast collided with the barrier, sending shockwaves through the multiverse. The very fabric of reality seemed to warp under the intensity of the clash, but Sung Jin-Woo stood firm.

Sung Jin-Woo: "This is the power of creation. And it will never bow to destruction."

A New Weapon

As the battle raged on, Sung Jin-Woo knew that mere strength would not be enough to defeat The Annihilator. He needed something more—something that could tip the balance in their favor.

Drawing upon the power of the Essence of Eternity, he focused his divine energy into his hand, molding it into a new weapon. It was a Divine Blade, forged from the very fabric of existence itself. The blade shimmered with an otherworldly light, pulsating with the essence of creation.

With a single swing, the Divine Blade cut through the void, leaving a trail of light in its wake. The very air seemed to hum with power as the blade cleaved through the fabric of reality, striking The Annihilator directly.

For a brief moment, The Annihilator's form flickered, its immense power faltering under the sheer force of the divine weapon. But it quickly recovered, its void essence contorting into an even more powerful form.

The Annihilator: "This is futile. You are nothing compared to the endless void. I will consume everything."

The Final Stand

Sung Jin-Woo’s eyes glowed with divine fire. He knew that this battle was far from over, but he would not back down. With the power of his divine jewels, the Essence of Eternity, and the strength of his army, he would stand against the forces of destruction.

He raised his hand, and the heavens themselves responded, aligning the divine forces around him. The ground trembled as he summoned the Divine Judgment, a torrent of divine energy that shattered the very fabric of the void.

The sky split open as the energy surged toward The Annihilator, its destructive forces attempting to fight back. But Sung Jin-Woo’s will was unyielding. The final battle for the future of the multiverse had begun.
